CHANGES IN COVERAGE OF CANADIAN TRADE STATISTICS

Effective with statistics for January, 1960, certain changes have been made in the types of transaction included in published totals of Canadian exports and imports. Most of the transactions included in these totals have always been commercial trade, but in addition various non-commercial and special transactions have also been included, and some types of special and non-commercial transactions have not received uniform treatment in both records. Especially in the last ten years there have been sizable differences between the balance of trade calculated from unadjusted export and import totals, and that calculated from data adjusted to exclude special and non-commercial transactions.

From January 1, 1960, a new category has been established in both export and import statistics entitled "Special Transactions - Non-Trade". This category includes various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis. The value of transactions of these types will be excluded entirely from published totals of Canadian merchandise trade, but statistics for the classes of this category will be compiled and published in the regular monthly export and import reports for the convenience of users of this information. As a result of these changes, the export and import totals will now have substantially the same coverage, and will provide a much truer picture of the merchandise trade component of the balance of payments.

The former treatment of the classes of transaction included in "Special Transactions - Non-Trade" is as follows:-

New Class No.	Description or Class Reading	Former Treatment in	
		Exports	Imports
9905-9965	Gold and current coin	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada	excluded	largely included
9982	Settlers' effects	included	included
9984	Private donations and gifts	included	included
9986	Tourist purchases	partly included	included
9988	Movements of goods for exhibition or competition	excluded	excluded
9990-9992	Photographic film moving for exhibition or processing without sale	partly included	partly included

(ii)

Totals of Canadian exports published on the new basis will be some \$30,000,000 per year less than on the former basis, those of Canadian imports some \$150,000,000 per year less. Revisions in comparative figures for 1946-1959 published in reports for 1960 and subsequently will be made on the following basis:

Former

Class No. _____

Class Reading _____

I. Deducted from export totals:

- 9470 Canadian army, navy and air force stores n.o.p. (to Dec.31, 1949).
- 9530 Settlers' effects.
- 9550 Gifts and donations.

II. Deducted from import totals:

- 9000 Film imported for the purpose of reproduction, and re-exported.
- 9051 Bequests of personal effects or furniture.
- 9068 Clothing and books, donations of, for charitable purposes, and photos (3) sent by friends.
- 9193 Articles for the Governor-General or for British or foreign representatives (also class 9192 to Dec.31, 1957).
- 9196 Arms, military stores, munitions and other goods, to remain the property of a British Commonwealth country or of a country that is a party to the North Atlantic Treaty (also class 9194 to April 9, 1951).
- 9201 Casual donations, sent by friends, the value of which does not exceed ten dollars in any case; personal gifts, not exceeding \$25.00 in value from members of Canadian forces serving abroad.
- 9228 Tourist purchases exempt from duty.
- 9241 Articles presented from abroad in recognition of the saving of human life (to Dec.31, 1957).
- 9264 Settlers' effects.

It is not possible to adjust out of former export records such tourist purchases as were included, since these are lost in various commodity class totals, and in so far as non-commercial film transactions are concerned these also can not be isolated. However the residual inaccuracy of comparative totals calculated in this way will be statistically insignificant. The residual error of comparative import totals calculated as described will be altogether negligible.

In addition to the abovementioned adjustments one further adjustment has been made to comparative import figures for 1946. In that year substantial amounts of Canadian military equipment were returned to Canada from the United Kingdom, Newfoundland and Australia. Such shipments accounted for almost all of the Canadian goods returned totals (class 9195) for these three countries in that year. The value for class 9195 for these three countries has therefore been deducted from the adjusted total. The residual overadjustment to the 1946 import total is believed to be statistically insignificant.

The following tables present revised totals of Canadian trade with All Countries, the United States and the United Kingdom, calculated as described above, for the period 1946-1959:-

NEW CLASSIFICATION OF COUNTRIES FOR EXTERNAL TRADE STATISTICS

A new classification of countries has been introduced for export and import statistics as of January 1, 1960. The new classification is basically geographical: for this purpose the world had been divided into nine geographic regions, and within each region the countries are listed alphabetically in two sub-groups, the first for Commonwealth countries in the region, the second for other countries. In future trade reports all basic statistics on trade by country will be presented according to the new classification of countries.

The regions used in the new classification, and the order in which they are listed, are as follows:

Western Europe
Eastern Europe
Middle East
Other Africa
Other Asia
Oceania
South America
Central America and Antilles
North America

The countries included in each area, and the definition of each used for statistical purposes, are shown on the following pages.

The order in which the various regions are arranged was determined by the convenience of listing the United Kingdom first when presenting statistics of commodities by countries, the United States last, directly above the commodity totals. This arrangement of country detail is traditional in Canadian trade reports, and has proven useful in permitting ready reference to details of trade with Canada's two most important trading partners.

The adoption of a new country classification facilitated extensive changes in the country detail shown in Canadian trade statistics. The drafting of these changes was guided by two criteria, which will also be used to guide future revisions to the classification:

- (1) Total trade between Canada and each country specified should exceed \$100,000 per year.
- (2) Available documentation must be adequate to compile accurate statistics of trade between Canada and each country specified.

In addition the names used for various countries have been brought up-to-date.

Details of the significant changes made in the classification of countries are as follows (comparative figures presented in future reports will be adjusted as far as possible to conform with these changes):

I. Countries Deleted

<u>Former Description</u>	<u>Trade Now Included With</u>
Aden	British Middle East n.e.s. (note that most of the trade with this territory is with Aden)
Azores and Madeira	Portugal
British East Africa	Kenya (for 1960 and future years trade with Tanganyika and Uganda will be shown separately, and that with British Somaliland included with British Middle East n.e.s.)
Canary Islands	Spanish Africa
Estonia	Union of Soviet Socialist Republics
French Africa	French Africa n.e.s. (for 1960 and future years trade with Algeria, French Equatorial Africa, French West Africa, Guinea and Tunisia will be shown separately)
Gambia	British Africa n.e.s.
Hawaii	United States
Indo-China	Viet-Nam (for 1960 and future years trade with Cambodia and Laos will be shown separately)
Latvia	Union of Soviet Socialist Republics
Lithuania	Union of Soviet Socialist Republics
Madagascar	French Africa n.e.s.
Other British South Africa	Union of South Africa
Other British West Africa	British Africa n.e.s.
Portuguese Asia	Portuguese Asia n.e.s. (for 1960 and future years trade with Portuguese India will be shown separately)
Portuguese West Africa	Portuguese Africa n.e.s. (for 1960 and future years trade with Angola will be shown separately)

EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.
2. **Valuation.** The value of goods imported is usually the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing at the date on which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.

Effective with statistics for January, 1959, the statistical value of imports on which dumping duty has been collected is considered to be the value of the goods as declared by the importer (i.e. the value for duty less the amount of dumping duty). This change in procedure is to conform with the principle that trade statistics should show, whenever possible, the actual amount paid for imports. Previously the statistical value of such imports was considered to be the value for duty.

3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers, power, and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units imported, while the value includes also the value of any parts of the commodity imported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include substantially all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series therefore includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.
5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods for the use of United States forces stationed at treaty bases in Canada, ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, Canadian-owned military equipment returned to Canada, and, from January 1, 1960, goods imported for foreign armed forces or diplomats stationed in Canada, settlers' effects, private donations and gifts, and tourist purchases exempt from duty (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. These imports are credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

CHANGES IN IMPORT STATISTICAL CLASSIFICATION EFFECTIVE APRIL 1, 1960

The Budget Resolutions of March 31, 1960, necessitated a few changes in the Fibres, Textiles and Textile Products group of the Import Statistical Classification.

The following list of changes is divided into three parts. The first deals with statistical classes which could not be continued after March 31, and which do not match closely any of the new classes established as of April 1. In this and subsequent reports for 1960 these classes will be presented under their former class numbers but statistics shown will be cumulative figures for the period January 1 - March 31, 1960. The second part of the list deals with cancelled classes which will be included in either new or pre-existing classes. These classes, as such, disappear entirely from this and subsequent reports, but cumulative totals are adjusted retroactively to January 1, for the classes indicated. The third part deals with the new classes established as of April 1. Cumulative figures for these classes (except class 3043) cover only the elapsed period of 1960 subsequent to April 1, and each of these classes (except class 3043) will bear an appropriate footnote reference in reports covering the last nine months of 1960.

1. Classes discontinued after March 31 (the cumulative figures for 1960 relate only to imports from January 1 - March 31, 1960):

<u>Class</u>	<u>Class</u>	<u>Class</u>
3011	3018	3021
3012	3019	3022
3013	3020	3023
3017		

2. Classes discontinued after March 31, and included in new or pre-existing classes (cumulative totals adjusted retroactively to January 1, 1960):

<u>Former Class</u>	<u>Included in Class</u>	<u>Former Class</u>	<u>Included in Class</u>

3048	3035	3221	3224
3049	3043	3572	3472
3212	3216		

3. New classes established effective April 1, 1960 (cumulative totals commence from April 1, 1960, except class 3043):

<u>Class</u>	<u>Reading</u>	<u>Unit of Quantity</u>	<u>Former Class</u>

3016	Cotton yarns n.c.p., including tinsel thread	Lb.	3013, 3017
3043	Cotton fabrics with cut pile	Lb.	3040, 3049

CHANGES IN COVERAGE OF CANADIAN TRADE STATISTICS

In previous years export and import statistics differed in their treatment of such special transactions as tourist purchases and shipments of goods to Canadian diplomats abroad or foreign diplomats in Canada, and in addition both records included such non-commercial transactions as movements of settlers' effects and private donations and gifts. From the beginning of this year the two records have been adjusted as far as possible to have the same coverage, and most private non-commercial transactions are now excluded from both. From January 1, 1960, a new category has been established entitled "Special Transactions - Non-Trade". This category includes various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis.

The former treatment of the classes of transaction included in "Special Transactions - Non-Trade" is as follows:-

<u>New Class No.</u>	<u>Description or Class Reading</u>	<u>Former Treatment in</u>	
		<u>Exports</u>	<u>Imports</u>
9905-9965	Gold and current coin.....	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada.....	excluded	largely included
9982	Settlers' effects.....	included	included
9984	Private donations and gifts.....	included	included
9986	Tourist purchases.....	partly included	included

Revised totals of Canadian trade with All Countries, the United Kingdom and the United States for the calendar years 1946-1959, and for 1958 and 1959 by months, were published in the January and 1st Quarter 1960, issues of the trade reports. The revisions for 1952-1957 by months, appeared in the July and 3rd Quarter 1960, export publications, and also in the May and 2nd Quarter 1960, import reports.

The following tables present revised totals of Canadian trade with All Countries, the United Kingdom and the United States for the period 1946-1951 by months, adjusted to the new basis of coverage.

CHANGES IN COVERAGE OF CANADIAN TRADE STATISTICS

In previous years export and import statistics differed in their treatment of such special transactions as tourist purchases and shipments of goods to Canadian diplomats abroad or foreign diplomats in Canada, and in addition both records included such non-commercial transactions as movements of settlers' effects and private donations and gifts. From the beginning of this year the two records have been adjusted as far as possible to have the same coverage, and most private non-commercial transactions are now excluded from both. From January 1, 1960, a new category has been established entitled "Special Transactions - Non-Trade". This category includes various commodity movements which either have no international financial implications or, for various reasons, are better considered separately from merchandise trade in economic analysis.

The former treatment of the classes of transaction included in "Special Transactions - Non-Trade" is as follows:-

<u>New Class No.</u>	<u>Description or Class Reading</u>	<u>Former Treatment in</u>	
		<u>Exports</u>	<u>Imports</u>
9905-9965	Gold and current coin	excluded	excluded
9980	Movements of goods for Canadian armed forces or diplomats abroad, or foreign armed forces or diplomats in Canada	excluded	largely included
9982	Settlers' effects	included	included
9984	Private donations and gifts	included	included
9986	Tourist purchases	partly included	included
9988	Movements of goods for exhibition or competition	excluded	excluded
9990-9992	Photographic film moving for exhibition or processing without sale	partly included	partly included

Revised totals of Canadian trade with All Countries, the United Kingdom and the United States for the calendar years 1946-1959, and for 1958 and 1959 by months, were published in the first 1960 issue of this report.

The following tables present revised totals of Canadian trade with All Countries, the United Kingdom and the United States for the period 1952-1957 by months, adjusted to the new basis of coverage, and revised totals for the period 1946-1951 by months, will be published as soon as totals are compiled.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.
2. **Valuation.** The value of goods imported is usually the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing at the date on which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.

Effective with statistics for January, 1959, the statistical value of imports on which dumping duty has been collected is considered to be the value of the goods as declared by the importer (i.e. the value for duty less the amount of dumping duty). This change in procedure is to conform with the principle that trade statistics should show, whenever possible, the actual amount paid for imports. Previously the statistical value of such imports was considered to be the value for duty.

3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers, power, and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units imported, while the value includes also the value of any parts of the commodity imported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include substantially all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series therefore includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.
5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods for the use of United States forces stationed at treaty bases in Canada, ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, Canadian-owned military equipment returned to Canada, and, from January 1, 1960, goods imported for foreign armed forces or diplomats stationed in Canada, settlers' effects, private donations and gifts, and tourist purchases exempt from duty (see blue pages of the January, 1960, issue of this report).

6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. These imports are credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

CHANGES IN IMPORT STATISTICAL CLASSIFICATION EFFECTIVE AUGUST 1, 1960

It has been necessary to make certain changes in the Import Statistical Classification in order to provide statistics urgently required for the administration of Section 40A (7)(b) of the Customs Act. These changes will be effective retroactive to January 1, 1958.

New import classes of certain fresh fruits were established as follows:-

<u>New Class</u>	<u>Reading</u>	<u>Unit of Quantity</u>
21	Apricots	Lb.
27	Prune plums	Lb.
28	Plums n.o.p.	Lb.

Note: As a result of these new classes requested by the Department of National Revenue, the coverage of Class No. 2 "Quinces and passion fruit" is now different since Apricots are now included in Class No. 21, and a new Class No. 26 "Nectarines" is also established. Class No. 17 "Plums or prunes" is discontinued.

The following two pages present the monthly and cumulative revised totals of the new classes retroactively to January 1, 1960. Revised statistics for the calendar years 1958 and 1959 will be published as soon as the survey is completed and the totals compiled.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.
2. **Valuation.** The value of goods imported is usually the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing at the date on which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.

Effective with statistics for January, 1959, the statistical value of imports on which dumping duty has been collected is considered to be the value of the goods as declared by the importer (i.e. the value for duty less the amount of dumping duty). This change in procedure is to conform with the principle that trade statistics should show, whenever possible, the actual amount paid for imports. Previously the statistical value of such imports was considered to be the value for duty.

3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers, power, and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units imported, while the value includes also the value of any parts of the commodity imported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include substantially all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series therefore includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.
5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods for the use of United States forces stationed at treaty bases in Canada, ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, Canadian-owned military equipment returned to Canada, and, from January 1, 1960, goods imported for foreign armed forces or diplomats stationed in Canada, settlers' effects, private donations and gifts, and tourist purchases exempt from duty (see blue pages of the January, 1960, issue of this report).

6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. These imports are credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.

EXPLANATORY NOTES

1. **Source of Data.** Statistics of imports are based upon the declarations of importers (import entries) as subsequently checked by customs officials.
2. **Valuation.** The value of goods imported is usually the value as determined for customs duty purposes. In most cases this corresponds to the value shown on the invoice accompanying the goods, converted to Canadian dollars at authorized exchange rates (usually the commercial rate prevailing at the date on which the goods were actually despatched to Canada), and excluding such charges as freight, insurance, handling and taxes. In effect, therefore, import values are taken f.o.b. point of shipment in the country of export.

Effective with statistics for January, 1959, the statistical value of imports on which dumping duty has been collected is considered to be the value of the goods as declared by the importer (i.e. the value for duty less the amount of dumping duty). This change in procedure is to conform with the principle that trade statistics should show, whenever possible, the actual amount paid for imports. Previously the statistical value of such imports was considered to be the value for duty.

3. **Units of Quantity.** Weight, where shown, is the net weight of the goods, excluding the weight of such packing as is required for shipment, except in certain special cases otherwise defined in the Customs Tariff. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

In this report are statistical classes such as "lawn mowers, power, and parts" which show a quantity in "number" and a value. In these classes the "number" refers only to the number of substantially complete units imported, while the value includes also the value of any parts of the commodity imported. For such classes the average value per unit cannot be ascertained.

4. **Coverage.** Statistics of imports include substantially all goods which enter Canada and are cleared by customs officials for domestic sale or use. The series therefore includes goods which are cleared by customs immediately on entry into the country, and goods cleared out of customs warehouses; but excludes goods placed in customs warehouses on entering the country. The technical phrase "Imports entered for consumption" which is sometimes used to describe Canadian import statistics does not imply that all imports will actually be consumed in Canada, but only that they are free to be so consumed without further customs formalities.
5. **Exclusions.** Import statistics exclude gold, but include gold products where the value of the gold content is less than 80% of the value of the commodity. A small amount of gold scrap in the form of jewellers' sweepings is also included. Other important exclusions are goods for the use of United States forces stationed at treaty bases in Canada, ships of British construction and registry imported for use in Canada, ships purchased for use in foreign trade, bunker supplies and ships' stores purchased by Canadian vessels abroad, temporary imports for exhibition or competition, Canadian-owned military equipment returned to Canada, and, from January 1, 1960, goods imported for foreign armed forces or diplomats stationed in Canada, settlers' effects, private donations and gifts, and tourist purchases exempt from duty (see blue pages of the January, 1960, issue of this report).
6. **Countries Credited.** Imports are usually credited to the country from which the goods were consigned to Canada. The country of consignment is the country from which goods have come to Canada without interruption of transit except in the course of transfer from one means of conveyance to another.

An exception to this rule is made in the case of imports of goods originating in Central or South America (including the Antilles and Bermuda) which are consigned to Canada from the United States. These imports are credited to the country in which the goods originated.

7. **Time Periods.** Import statistics for any month include all goods declared on import entries received at the Bureau of Statistics during the calendar month in question.
8. **Abbreviations.** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. A key to abbreviations of countries appears in this report, and full descriptions of all commodities appear in Volume III of the annual report "Trade of Canada". The letters "N.O.P." mean "not otherwise provided for", "N.E.S.", "not elsewhere specified".
9. **Revisions.** All statistics in this report are subject to revision. Revisions to previous reports are published on the coloured pages at the beginning of each monthly report.
